

READINESS LIVING WORKSHOPS

820.10 TABLETOP EXERCISE: PLANNING YOUR JOURNEY

The New Madrid Fault has produced a massive earthquake that has left you and your group without electricity, food, medicine, gasoline, water, sanitation, or communications. The infrastructure is gone. You have sufficient food.

Your All Hazards Radio is broadcasting relief station locations. The closest available base of operations is at *least a four day journey on foot*. Your team of ____ has *only enough water rations for 1 quart per day per person*. Many of the natural water sources have hazmat issues from ruptured sewers, chemical plant fire plume, gasoline stations and is not potable.

It is June 22, 20XX and the NOAA weather alert channels are reporting day time temperature *highs at around 98 degrees with a relative humidity of 85%*; night time lows of 78 degrees with no rain in sight for the next week.

Your team has one special needs individual. A litter will be needed to transport them. This individual has a military background and land navigation skills. In addition, the earthquake has forced snakes from their habitat; abandoned hungry dogs have formed aggressive packs; human wolf packs are looting and committing heinous acts of lawlessness. Stealth is paramount to success.

TASKING

- Give your team a name: _____.
- Assign a scribe (someone to write your plan)
- Develop a strategy to accomplish your journey
- What items from the narrative of the Ready Pack would you utilize
- Present a detailed plan for the safe arrival of your group
- Designate a spokesman to report your strategy to the class
